SIMBA SAFARI - 10 Days (includes air travel days)

Day 01 - Depart U.S. for your European gateway to Tanzania.

Day 02 - Arrive Kilimanjaro International Airport (JRO) in Arusha, Tanzania. Transfer to the Mountain Village Lodge.

Day 03 - Morning departure for Lake Manyara. Your hotel - Lake Manyara Hotel - is located up on the escarpment overlooking the Rift Valley. Afternoon game drive in the National Park below. (BLD)

Day 04 - After breakfast proceed into the great Serengeti - Swahili for endless plains. You will make an en-route stop at the Olduvai Gorge - 'cradle of mankind'. There is a small museum here at Olduvai, seemingly in the middle of nowhere, that is surprisingly good. Continue on to the Serengeti Sopa Lodge with game viewing en-route. (BLD)

Day 05 - Optional sunrise balloon safari. Full day of game drives in this fantastic animal kingdom. At 5600 square miles the Serengeti is EIGHT times larger than the northern part of this eco-system in Kenya - the famous Masai Mara. Overnight again at the Serengeti Sopa Lodge. (BLD)

Day 06 - After breakfast depart to the Eighth Natural Wonder of the World - Ngorongoro Crater (a caldera or collapsed volcano). En-route stop at a local farm - Plantation Lodge. Light hike to the local waterfall before lunch. Continue on in the afternoon to the rim of the crater and the Ngorongoro Sopa Lodge. (BLD)

Day 07 - Entire day will be spent 2000 feet down on the floor of this fabulous crater which is teeming with wildlife. This is one of the best places to see black rhinos. The crater elephants also have some of the largest tusks in all of Africa. Picnic lunch at one of the hippo pools. Late afternoon return to the Ngorongoro Sopa Lodge for overnight. (BLD)

Day 08 - After breakfast proceed down into the Rift Valley and on into Tarangire National Park. Game drive en-route to your lodge - Tarangire Sopa. Afternoon game drive through the giant baobab trees. (BLD)

Day 09 - Early morning departure for the drive back to Arusha. Your lunch will be en-route with an afternoon arrival at Mountain Village Lodge. There is a day room here for you to organize yourself for the trip home. After dinner you will be transferred to the Kilimanjaro International Airport to begin your safari - Swahili for journey - home. (BL)

Day 10 - Connect in European or African gateway. Arrive in the U.S. and connect to your flight home.

Inclusive meals as indicated (B = Breakfast, L = Lunch, D = Dinner)

TANZANIA NATIONAL PARKS AND RESERVES

LAKE MANYARA NATIONAL PARK

Lake Manyara is nestled under the wall of the Great Rift Valley. The park is made up of five distinct vegetation zones: ground water forests with towering mahogany and fig trees, extensive marshland reeds, plains of open grassland, parklands scattered with acacia trees, and the characteristic scrub land of the Rift Wall.

This park is famous for its numerous Cape Buffalo, Elephant, Leopard and, especially, tree climbing Lions. There are also over 350 species of birds. Both park hotels sit 1,000 feet up on the plateau allowing breathtaking views of Africa.

SERENGETI NATIONAL PARK

The Serengeti is a place where the animals know they have inherited the earth. In this 5,790 sq. mile National Park, millions of animals, apparently having the world to themselves, re-enact creation every year. They live in total freedom on limitless plains scattered with rocky outcrops, patches of acacia bush, forest and occasional small rivers. The park contains more than 35 species of animals including 1.8 million Wildebeest and 500,000 Zebra (seasonal). Also, there are approximately 2,000 Lions as well as an extensive variety of bird life.

Both Wildebeest and Zebra are involved in one of the most spectacular of natural phenomenon, the annual Serengeti migration. They are followed by the predators and scavengers constantly on the watch for animals weakened by the long trek.

NGORONGORO CRATER

The eighth natural wonder of the world, Ngorongoro, was an active volcano some eight million years ago whose cone collapsed. This left a crater, or caldera, of 120 sq. miles, one of the world's largest. Unlike other African ecological systems, the crater habitat is permanently watered and thus able to support a year-round residential population of animals. Sheer physical beauty and the abundance of unusually docile game animals, as well as some notable birds, make up the magic of the Ngorongoro Crater.

TARANGIRE NATIONAL PARK

This park has a wildlife population which compares in density with that of the Serengeti and other prime national parks. A special feature of the park is the presence of the Greater Kudu. Tarangire is at its most spectacular between June and December when thousands of animals migrate into the park.

Simba Safari*	Tour Cost (Per Person)	Single Room Supplement
Wildlife Lodge Operates on request	\$2280	\$550
Serena Lodge Operates on Thursday's	\$2635	\$430
Rainy Season (Apr 01 - May 24)	Upon Request (Up to 30% Less)	
Late Season (Nov 01 - Dec 15)	Upon Request (Up to 15% Less)	

To ensure your space and operation, the optional Balloon Safari excursion can be arranged through the Safari Express Company.

Optional tribal village visits must be arranged through your guide.
